Creative Generalist & Technical Artist

I'm self-driven, love every step of a project, and like making things work a little better each time. Happy doing the creative part, happy building a tool to do it faster. Trained on a large dataset of my own mistakes. The useful learnings are on YouTube, the others should probably be a podcast. Until then, you can ask me.

Experience

Creative Generalist & Technical Artist Dec 2025 – Present
CrossDot · Co-founder
Motion design and advertisement projects with a focus on Houdini-based workflows
Building tools and connecting software across the pipeline to implement and extend features
